THE SMARTEST SUMMER ESCAPES & ONE AMAZING NEW PARK

167: NUMBER OF DISPOSABLE PLASTIC BOTTLES, ON AVERAGE, USED IN THE U.S. PER PERSON PER YEAR

4. CamelBak Antidote 100

CamelBak started the reservoir revolution, and it still makes one of the best. A new quarter-turn lid on the 100-ounce Antidote prevents overtightening, a common mistake. The opening is now large enough to fit a hand inside the bladder for cleaning. And a baffle running halfway up the interior keeps sloshing to a minimum. Best of all: the bite valve leaks the least of any system we tested. \$35; camelbak.com

Fluid Dynamics

THE WATER BOTTLE GETS NICHE, HERE'S WHY YOU SHOULD CARE.

by Grant Davis

Perusing the water bottle section at REI can be overwhelming. Plastic, metal, or... bamboo? Maybe a hydration pack? Or what about that weird-looking water-glove thingy? Fortunately, while overengineering has reached absurd heights, some of the new developments really do make for improved drinking, whether you're in the backcountry, at your desk, or somewhere in between. Case in point: one bottle will even make beer.
