GADGET GODDESS OLIVIA MUNN

JOB DC POWER FOR POWE

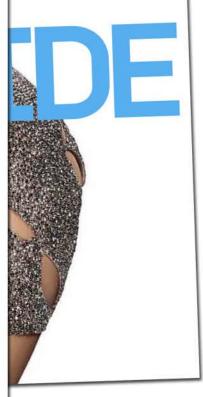

## CAMELBAK GROOVE

Disposable plastic water bottles are wasteful—only one in six are recycled. But tap water often tastes like, well, waste. With its integrated replaceable filter, this 0.6-liter power sipper provides a superior solution to both problems. As you draw water through the big-gulp straw, the filter defunkifies with each sip, reducing chlorine, mercury, copper, cadmium, and lead. Each swappable filter is good for 300 refills and replaces 375 plastic bottles. \$35, camelbak.com
